1 Target Audience

This document is mainly for the attention of school users in particular to those who like to build and maintain:

- Queries in Data Management module of WebSAMS;
- Packages in Data Query Tool (DQT) module of WebSAMS;
- Report templates of Crystal Reports.

2 Upgrade of database software

2.1 Note for upgrade to SAP SQL Anywhere 17

Upgrading of WebSAMS will involve the replacement of database management system from SAP SQL Anywhere 16 to SAP SQL Anywhere 17. As there are no compatibility issues found in executing SQL statement between SAP SQL Anywhere 16 and SAP SQL Anywhere 17, users do not need to make any changes for the school-defined SQL statements.

3 Upgrade of reporting tool

3.1 Note for upgrade to SAP Crystal Reports 2020

Upgrading of WebSAMS will involve the upgrading of reporting tool from SAP Crystal Reports 2013 to SAP Crystal Reports 2020. To cater for the changes after upgrading WebSAMS version 3.0 to version 3.1, users are required to follow the steps in section 3.3 and 3.4 to configure workstations installed with Crystal Reports 2020 in order to let them run smoothly in the new environment. Basically, all existing report templates which are created with SAP Crystal Reports 2013 are compatible with SAP Crystal Reports 2020. However, discrepancies may be found in the report printouts. Users may follow the steps in section 3.3 and 3.4 to update corresponding report templates in order to rectify the discrepancies.

3.2 Configuration of workstation for Crystal Reports Designer 2020

Please make sure the workstation for editing report templates is resided in the WebSAMS network segment and has installed and configured Crystal Reports Designer 2020.

Detailed procedures are specified in *Crystal Reports Designer 2020 Installation Guide* and *SAP SQL Anywhere 17 Installation Guide*.

3.3 Update School-defined Crystal Reports Templates after migration to SAP Crystal Reports 2020

As SAP Crystal Reports 2020 handles fonts, lines, sorting and HTML codes differently, the report printouts might be displayed differently. The following update processes can help users to rectify the common errors or discrepancies found in the school-defined report templates.

The updated school-defined report template should be uploaded to the WebSAMS for report printing as usual.

3.3.1 Impact on font size

Missing label, misalignment, overlapping of words or words with missing underline could be found in the report templates. Manual adjustment is required in order to rectify the problem.

Example 1 (sample report: R-STU079-E_H)

In the column header, "Total" is missing.

Before					Afte	ər				
PE-A	PHY	PTH	RSC		1	DET	ECON	ELIT	EPA

******				4					*	12
				4					*	13
				4		*			*	13
*******				*******		*			*	13
						*			*	13

Suggested solution

- 1) Widen or lengthen the textbox; or
- 2) Reposition the label.

3.3.2 Impact on output table

Extra empty rows would appear at the bottom of the table if the number of items is less than the number of rows. To fix this issue, users are advised to remove the additional lines of the table one by one.

Example 1 (sample report: R-STA005-C)

3.3.3 Impact on table sorting sequence

The sorting sequence is different when the display language is different. The correct sequence should follow the English description in alphabetical order for both English and Chinese reports. To fix this issue, users can add an additional sorting criteria for the report. There are two suggested ways to edit the report.

Example 1 (sample report: R-STU202-C)

The sorting sequence is different.

Suggested solution (Fix by using "Record Sort Expert")

1)	Double click the field.
2)	Open the "Record Sort Expert" by clicking the icon.
3)	Move the TB_HSE_COMMON.EN_DES (without _1) to Sort Fields. Record Sort Expert Available Fields: TB_STU_SPE_SERVICE.SUID TB_HSE_COMMON.EN_DES TB_HSE_COMMON_1.EN_DES TB_HSE_COMMON_1.TB_ID TB_HSE_COMMON_1.TB_ID
